TECHNICAL DATA SHEET

BioShield Quat Guard Canister

Water Based Surface Sanitiser

- Tested Against Envelope Viruses
- Kills 99.9% of Bacteria • Water Based Disinfectant
- High Coverage • Self Contained System
- Light, Mist Spray

DESCRIPTION:

Quats (Quaternary Ammonium Compounds) are powerful compounds that are commonly used in disinfectant products. BioShield Quat Guard is a water-based surface sanitiser that uses specialised Quat Salt Technology to act as a disinfectant with less hazards than traditional alcohol-based sanitisers, additionally the water based nature reduces the chances of incompatibility between the sanitiser and the surface. The mist spray covers large areas quickly and easily and the self-contained units can be used without external pressure equipment such as compressors.

BioShield Quat Guard is compliant with the following standards:

EN1040 - Basic Bactericidal Activity of Chemical Disinfectants and Antiseptics

EN1276 - Chemical Bacterial Activity in Food/Industrial/Domestic.

EN13697 - Valuation of Bactericidal and/or Fungicidal Activity of Disinfectants used in Food, Industrial, Domestic and Institutional Areas

EN1650 - Chemical Fungal and Yeast in Food areas/Industrial/Domestic.

EN14476 - Chemical Disinfectants and Antiseptic: Virus in medical conditions.

TECHNICAL SPECIFICATION:

PROPERTY	Quat Guard
Base	Water
Available Sizes	22L
Spray Type	Fine Mist
Colour	Colourless
Odour	Light, pleasant fragrance

TECHNICAL DATA SHEET

DIRECTIONS FOR USE:

- USE IN A WELL VENTILATED AREA
- Quat Guard is suitable for a wide variety of surfaces but it is always advisable to test a small area prior to large scale application
- 1. Connect a suitable spray tip, such as a UNIJET 9501, to the end of the spray gun. Then connect the gun to a hose. Connect the hose and gun assembly to the canister and tighten the connections.
- 2. Turn on the canister valve, if there are any leaks, tighten the connection at the source of the leak.
- 3. Hold the gun 20-25cm away; perpendicular to the surface to be sprayed.
- 4. Apply and even coating of sanitiser across the surface.
- 5. The product can be left on the surface and will evaporate naturally after around 30 minutes.
- 6. This product contains a percentage of water so should be used with caution on electrical items.

STORAGE & SHELF LIFE:

Protect from extremes of temperature in a controlled environment between 5 and 25°C, and away from direct sunlight. Do not stand on a cold concrete floor. Stored under the correct conditions, in original, unopened containers, the product will have a shelf life of 12 months.
